# RÜKTECH Snowmobile Coatings

RükTECH has race-proven coatings for your snowmobile to keep it running at peak performance. With today's turbo boosted sleds, high temperature ceramic coatings are paramount to winning.

Winter is short and the time you have to sled is precious. Our products and coatings help keep your sled on the hill so you can do what you love. Call today and see how our coatings will make your sled the best on the hill.

## Benefits of RükTECH Polished or Black Coating:

- Increased Component Life, no rusting from corrosive salt.
- Reduced Under hood Temps protects wiring and other parts.
- Superior corrosion protection from chemicals and prevents rust.
- Performance Gains over non-coated, easily damage parts.
- Polished, Black, Bright Silver and Titanium color options.
- Excellent Impact Resistance which protects from debris.
- Will work on New and Used Components on any metal surface.
- Will not turn Blue, Oxidize, or Stain like chrome or paint.
- Heat that is retained in the pipe provides faster turbo spool and quicker starts, even after the sled has cooled down.
- Peace of mind that your sled is running at its very best and you are the king of the hill.

## Benefits of RükTECH Piston and Bearing Coatings:

- Applicable to New or Used Pistons.
- Only New Bearings can be coated.
- Increases Radial Tension Life of the Rings by preventing heat soak into the rings grooves.
- Enhances Flame Propagation and decreases coking.
- Eliminates Cold and Hot Sticking.
- Internal coating on the piston can increase oil shedding.
- Lower running temperatures on Bearings.
- 5x to 10x more Bearing life which saves you money.
- Increased oil retention and protection from heat and pressure.
